INTRODUCTION

The story of *Turrican* begins in the lost colony of Alterra, a completely man-made "lifeworld" abandoned long ago in a nearby galaxy. Alterra is actually four colonies in one. Each self-contained habitat has been separately bio-engineered by a powerful ecosystem generation network known as a Multiple Organism Unit Link — MORGUL, for short.

Early colonists used MORGUL to render Alterra inhabitable. But a cataclysmic quake severed all system interface functions ... and MORGUL murderously "rebelled." Those few colonists lucky enough to escape told a grim tale of a higher intelligence gone berserk.

THE MISSION

For generations, mankind sought a return to Alterra. Finally, genetic science created a "saviour":

Turrican, a mutant warrior, bio-engineered for the task of planetary reclamation.

In the meantime, MORGUL has diligently twisted Alterran life forms to his brutal, destructive purposes. Thus, Turrican's challenge:

ONE. Eliminate hostile organisms from Alterra's four multi-level worlds.

TWO. Destroy the three faces of MORGUL.

GETTING STARTED

- 1 **IMPORTANT:** Always be sure that the system is turned OFF before inserting or removing a cartridge.
- 2 Insert the *Turrican* cartridge into the TurboGrafx system by following the instructions in your user's manual.
- 3 Turn the power switch ON. If nothing appears on-screen, re-check your cartridge to be sure it is inserted properly.
- 4 After the title screen appears, press the **Run Button** to begin the game.

PLAYER CONTROLS

Use the TurboPad™ to (1) direct Turrican's movement, and (2) select & fire his weapons.

Note: You can also customize the button functions. (See **The Menu** section.)

Direction Button

I Button

Press: Turrican jumps.

II Button

Press quickly: Fires currently selected weapon.

Press & hold: Fires lightning whip.

Press + **Direction-▼**: Releases mine.

Run Button

Press: Pause.

Press + **Select** (hold 3 seconds): Reset.

Select Button

Press once: Fire button releases grenade.

Press twice: Fire button releases power line.

Other Controls:

To transform Turrican into a “buzzsaw,” press & hold the **I Button**, then press **Direction (▼)**.

To return Turrican to his normal state, press **Direction (▲)** or the **I Button**.

Moving the **Turbo Switch up** fires several bursts and then activates the lightning whip.

Note: See the section on **Turrican’s Weapons** for descriptions of each weapon.

THE MENU

Here’s where you can start a new game or customize your button functions. After you boot the cartridge, press (**Direction ▲/▼**) to highlight **Start Game** or **Options**, then press **Run** to activate.

To change button functions: Select **Options**, Press **Run**, then press **Direction (◀/▶)** to toggle the assigned functions for the buttons. When you have the configuration you want, highlight **Exit** and press **Run** to return to the Menu.

TURRICAN’S WEAPONS

Turrican lets you choose from a variety of weapons. Read the following descriptions to learn how each weapon works in the game, then review the **Player Controls** section to learn how to activate a chosen weapon:

Gun: Fires laser bullets at target. (Certain tokens that you collect in the game will alter your gun’s firing mechanism. See **Tokens, Crystals & Continues**.)

Lightning Whip: Whips high-energy laser in a deadly arc. (Turrican must stand still.)

Power Line: Zaps foes left & right with vertical ionizing bolts.

Mines: Destroys all enemies on surrounding surface.

Grenade: Liquidates every enemy in vicinity (if it hits a solid surface).

Buzzsaw: Turns Turrican into a deadly rotating blade. (Turrican can assume the buzzsaw form only *three times* during any given life.)

STATUS INDICATOR DISPLAY

The Status Indicator Display at screen bottom shows Turrigan's current status and progress.

- ❶ **Time:** Number of time units remaining at the current level.
- ❷ **Continues:** Current number of Continues remaining.

- ❸ **Buzzsaw:** Number of times Turrigan can transform into buzzsaw.
- ❹ **Current Lives:** Number of "lives" Turrigan possesses.
- ❺ **Crystals:** Number collected toward new Continues. 300 crystals give you an extra Continue.
- ❻ **Grenades:** Remaining grenades.
- ❼ **Mines:** Remaining mines.
- ❽ **Energy Bar:** Turrigan's current level of endurance.
- ❾ **Score:** Your score is kept while you play.
- ❿ **Power Lines:** Shows number of power lines remaining.

TIME

You are allotted a limited number of time units for each level. Time units are shown on the Status Indicator Display. If your time runs out, you lose a life.

TOKENS, CRYSTALS & CONTINUES

During play, valuable tokens are available for Turrigan's pursuit. These are often hidden inside boxes and other objects. Some add lives and restore energy; others add to Turrigan's arsenal. Collecting more than one of certain "weapon" tokens will increase that weapon's potency, or extend the period of time it can be used.

Gives Turrigan one extra life

Fully restores Turrigan's energy level

Activates gun's "multiple shot"—if it's already active, additional tokens extend capability

Activates gun's quick-firing "laser blast"—if it's already active, additional tokens extend capability

Activates a force field which gives Turrigan a brief period of invulnerability

Extra mine

TOKENS, ETC. (continued)

Extra grenade

Extra power line

Increases length of lightning whip

Crystals are present throughout the game. When Turrican passes

over a crystal, he accumulates points towards another **Continue**.

Continues

You start with 3 Continues per game. If you lose all your lives, but have a Continue, you can start over with three (3) new lives at the beginning of the *current level* rather than back at the first level. Simply select **Continue** when the "drop-down" message appears.

ENEMIES: ALTERRA'S MUTANT HORDES

A wide variety of enemies populate the different levels of play. Hundreds of deadly **drones** swarm on every level ... but be particularly wary of the gargantuan **bosses** that lurk in seven different Alterran outposts. These monstrous super-creatures pose a daunting challenge for Turrican:

The Gauntlet: A remnant of a terraforming robot, this airborne monster once rounded mountains into arable land. Now it wants to pulverize a careless Turrican.

Dead Head: This cranial remnant of a giant construction robot continues to supervise the building site as if the colonists had never left. The head views intruders with displeasure, and will attempt to destroy Turrican by Energy Phase Cannon fire or a convincing crushing.

Mother Fish: This gigantic, bio-engineered fish requires quantities of energy to produce an endless supply of gobbling guppies. She's a ravenous creature, foul-tempered and insistent.

Trash Master: The ultimate garbage disposal grinds up waste and produces fuel. Regards Turrican as another tasty morsel.

Monolith: An alien machine of unknown origin guards the caverns against all intruders.

ENEMIES (continued)

Queen Mother: This colossal breeder, font of all insect life in the subterranean worlds, has multiple heads, and a fierce will to survive.

MORGUL: With brains in triplicate, this most awesome of all Turrican's foes is a real thinker.

THE FOUR WORLDS OF ALTERRA

You play *Turrican* across the four multi-level worlds of Alterra, each containing its own distinct features and variety of ill-tempered foes.

Read the descriptions which follow to learn more about each world and its individual levels.

World One

Level 1.1: An exterior world on the outer fringes of the former colonist civilization. It contains scattered outpost towers and odd life forms that dwell in caves and on cliff faces. Danger from earthquakes and autosensors exist; flying observation platforms are a constant nuisance.

Level 1.2: Another exterior world, 1.2 features larger caves and an abundance of man-made structures. The air is charged with ions, and the skies can erupt in lightning displays.

Level 1.3: Contains the start of an outer city. Gargantuan skyscraper structures soar to the heavens.

World Two

Level 2.1: A subterranean setting. Once a manufacturing zone to supply the colonist-builders with food and goods, 2.1 is now an abandoned fish farm breeding swarms of voracious killer fish.

Level 2.2: Into this lower world has fallen all the refuse and debris from the colonist enterprise. Recycling and incinerating devices still operate, and defenses are active.

World Three

Level 3.1: Welcome to a maze of caverns created by millions of years of subterranean river action, then expanded by industrious insect colonies. Ceiling-hanging stalactites drip the poison effects of leftover machinery into the waters beneath, while skeletons of ancient victims mar the scenery.

Level 3.2: A second set of caverns wider than the first are marked by a series of dangerous ledges and bottomless pits. Hydrabirds breed in the gloom. The bones of would-be escapees from the doomed colonies clutter this maze. Scattered amongst them are glittering examples of mined crystals.

Level 3.3: A third and final maze of deadly caverns and treacherous chasms. Loosing your sense of direction is as much a threat as the creatures which lie within.

World Four

Level 4.1: MORGUL's central computer is located in this vertical control tower. Bio-engineered life forms do guard duty on the tower's exterior; inside, a dense automated network of defenses protects the master controls found in the computer core.

World Four (continued)

Level 4.2: A web of solid circuitry surrounds the computer's core.

Blast through to reach the electronucleonic brain ... and MORGUL.

STRATEGY TIPS

- Hidden boxes contain interesting surprises.
- Leaps into space may yield more than a thrilling free-fall.
- Exploration yields rewards.
- Don't drink from waterfalls.
- Obstacles needn't block Turrican's pursuit of extra lives.
- The rotary saw is one tough blade.
- Use available resources.
